*Offer valid 11/01/23-12/31/23. Not valid with other offers. Contact us for details.

Why Is Treating Your Water Important?

Water touches so many parts of your life every single day.

It has an effect on your health, your home, your skin, your clothes, even your pets!

Some people have extreme contaminants in their water ranging from PFAs to lead to bacteria to arsenic. While others have more common ones such as hardness or chlorine. And sometimes treating your water seems costly, but it is an investment! The return on good water will extend your appliances, cut energy costs, cut back on your bottled water and cleaning supplies costs, and allow for your skin, hair and overall self to feel better!

Local Spotlight!

Albert, a lawyer-turned-bookstore owner, moved to Honeoye Falls from Hong Kong! While selling new & used books by mainstream authors, the shop has a section dedicated to writers from Hong Kong and books about it. The work of Hong Kong artists hang on the walls, while a mural by artist Yerke Abuova is on the ceiling displaying the floor plan of the original store.

This eclectic gem deserves a visit to Honeoye Falls' main street.
